Education

2023 — Present B.Tech. (I.T) at **Aditya Engineering College**

CGPA: 8.21

Technical Skills

Languages	C, Java, Python, JavaScript
Web & Backend	React.js, Node.js, Express.js, HTML5, Tailwind CSS, REST APIs
Databases	MySQL, MongoDB
Cloud & DevOps	AWS, Linux, Git, GitHub
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems
Tools	Postman, Figma, VS Code

Experience

Java Intern @Brain O Vision — Hyderabad

(May 2025 – July 2025)

- Built responsive web components using HTML, CSS, and JavaScript, improving application stability by identifying and fixing UI and logic-level issues through structured debugging.
- Participated in technical discussions with mentors to analyze functional requirements and translate them into implementable components.

AWS DevOps Intern @Technical Hub — Surampalem

(May 2025 – July 2025)

- Gained hands-on experience with AWS services including EC2, S3, and IAM while exploring real-world cloud architecture patterns.
- Analyzed 10+ resource utilization trends and suggested improvements aligned with operational efficiency.

Fasal Sathi – AI-Powered Multilingual Crop Platform | *Python, TensorFlow, Web Speech API* [Source Code](#)

- Built an AI-driven crop advisory and disease detection system using Python, TensorFlow, and computer vision, enabling real-time decision support for farmers.
- Implemented a multilingual voice interface (English, Hindi, Telugu, Marathi), improving accessibility for rural users.
- Designed a scalable, modular architecture integrating weather, crop insights, and market data for real-world applicability.

Dev Flow Guardian – Developer Dashboard | *React.js, Tailwind CSS, Git Hub, Vite* [Live Demo](#) | [Source Code](#)

- Built and deployed a full-stack developer productivity platform (Dev Flow Guardian) using TypeScript, Vite, Supabase, and Vercel, demonstrating real-world SaaS architecture.
- Implemented onboarding, dashboards, and AI mentor features, improving UX realism and product depth beyond typical portfolio projects, Improved efficiency over 20% and reduced loading time under 30%.
- Established CI/CD workflow with GitHub and Vercel, enabling continuous deployment of a live application

FinOps-Cloud-Immunity | *AWS Lambda, EC2, S3, Event Bridge, SES, API*

[Source Code](#)

- Built an automated monitoring system using Python and AWS services to identify unused or idle cloud resources (e.g., EC2, S3).
- Improved cost efficiency over 30% and optimized the services over 25%
- Designed the solution with scalability in mind, supporting modular tracking of multiple AWS services.

Achievements

GeeksforGeeks Campus Mantri - Brand Ambassador
